Zahvaljujemo Vam na sudjelovanju na testiranju inteligencije, održanom u Splitu 05.11.2011. godine, u organizaciji Hrvatske Mense.

Rezultat Vašeg testa je sljedeći:

IQ: 123 Centil: 94

Prosječni kvocijent inteligencije (IQ) iznosi 100, a prosječni centil je 50. Prosječni rezultat je onaj između 25. i 75. centila (IQ/sd15 90-110) i istog ostvari 50% ukupne populacije. Rezultat iznad 75. centila (IQ/sd15 > 110) je iznadprosječan i istog može ostvariti manje od 25% ukupne populacije. Rezultat iznad 90. centila (IQ/sd15 > 119) je visoko iznadprosječan i istog može ostvariti svega 10% ukupne populacije. IQ/sd15 131 ili više, odnosno centil 98 ili više znači da je postignut rezultat unutar gornjih 2% ukupne populacije na testu inteligencije te da je time ispunjen uvjet za primanje u članstvo Mense.

Iako niste ispunili uvjet za primanje u članstvo Mense, čestitamo Vam na rezultatu kojeg ste postigli, uz želju da Vas isti potakne i ohrabri da u životu ostvarite sve ono dobro što želite, kako na dobrobit Vas tako i društva u cjelini!

S poštovanjem,

Petra Malešević, dipl. psiholog
psiholog Hrvatske Mense
